Re: United States vs. Kevin Lee Poulsen  
Case No.: CR 93-376(a)-R

Dear Mr. [redacted] and Ms. [redacted]

Attached please find Responses which have been prepared to the questions proposed to Mr. Poulsen as contemplated by the plea agreement between the parties. Please be advised that these responses are limited to Mr. Poulsen's activities with respect to activities covered by the charges contained in the indictment pending in the Central District. These answers do not contemplate activities undertaken by third parties or activities undertaken by Mr. Poulsen which might be covered by allegations set forth in the indictment pending in the Northern District of California. To the extent that the questions contemplate activities allegedly undertaken by Mr. Poulsen for charges covered by the indictment pending in the Northern District, he will be glad to provide further answers to these questions as soon as the case in the Northern District has been complete resolved.

139C-C-A-127588-1908

[Redacted]  
October 20, 1994

Page 2

These responses are based upon Mr. Poulsen's best recollection of events which occurred more than three years ago and have been prepared without access to documentary information.

Please contact me if you have further questions related to the enclosed answers to the questions previously presented.

Sincerely yours,

[Redacted]

--

b6  
b7C

2. The defendant did not agree pursuant to the plea agreement to provide information concerning the activities of third parties and therefore declines to answer this question.

3. The defendant did not agree pursuant to the plea agreement to provide information concerning the activities of third parties and therefore declines to answer this question.

4. On PBSDTS, the defendant modified /ETC/GETTY to provide back-door root access and capture passwords. From time to time, the defendant modified /BIN/LOGIN to capture passwords or other COSMOS machines, as well as on MIZAR, PREDICTOR, and NSDM systems.

5. Yes.

a. 

--

b6  
b7C

b. The defendant disclosed some technical information regarding [redacted]

[redacted] and discussed the identity of the subject of [redacted]

[redacted]  
c. Dates uncertain.

6. No.

7. Defendant may have disclosed any and all of the following fake business names for leased phone lines used to [redacted] LCR systems, Acme Dataprocessing, Industrial Services, and Busy Bee Answering Service.

b6  
b7C  
b7D

b. [redacted]

c. Dates uncertain.

d. Defendant was only aware of one company [redacted]  
[redacted] and does not recall the name(s) of this company.

Defendant does not believe the name(s) was disclosed to anyone at anytime.

8. a. Yes.

b. The defendant traveled to the [redacted] on one occasion but did not enter the facility.

c. Date uncertain.

9. The defendant once unsuccessfully attempted to use SASS to capture a car dealerships phone line to transmit false credit information regarding a car purchase application submitted by the defendant.

a. The dealership was located in North Hollywood, but defendant cannot recall the name of the dealership.

b. Date uncertain.

10. No one.

11. No alterations.

12. No.

13. No.

14. No.

15. No.

16. No.

17. Defendant does not believe there is anyone with his abilities. Defendant believes that hackers would not be an attractive target to foreign governments because they would be unreliable, the information they produced would be questionable, they would have a tendency to brag about their relationships with a foreign government and would most likely be arrested for other crimes such as the misuse of credit card information. If foreign governments believed that computer intrusions were an effective method of intelligence gathering, it is the defendant's opinion that they would develop their own "home-grown" hackers, possibly supplemented with co-opted phone company employees.

18. a. 

b.

c. Allowed limited read-only access to technical information on phone lines and circuits.

19. Defendant has scanned E-mail on phone company corporation systems for references to his own intrusions. Defendant rarely used BSSs.

20. No.

21. No.

22. a. 

b. Uncertain.

c. Defendant gave information to both but did not sell information to them or others.

QUESTIONS FOR KEVIN LEE POULSEN

1. List all CO's where you performed physical break-ins?.
  - a. Have you accessed CO's apart from those in the greater Los Angeles and San Francisco areas?
2. List all individuals with whom you performed physical break-ins at phone company CO's?
3. Identify all individuals with whom you performed computer break-ins into phone company computers?
4. Having gained unauthorized access to [REDACTED] what modifications did you attempt to make to those systems?
  - a. What modifications did you succeed in making?
5. Did you disclose any of the information [REDACTED]  
[REDACTED]  
[REDACTED]
  - a. Who did you tell?
  - b. What did you tell them?
  - c. When did you make these disclosures?
6. Did you attempt to contact any of the subscribers [REDACTED]  
[REDACTED] b7D
7. Did you disclose any of the names of various companies [REDACTED]  
[REDACTED]
  - a. If so, what companies did you disclose?
  - b. To whom did you make disclosure?
  - c. When did you make these disclosures?
8. What was the nature and extent of your efforts to confirm the existence and location of the companies [REDACTED]  
[REDACTED]
  - a. Did you ever travel to any of the locations [REDACTED]  
[REDACTED]
  - b. Which ones?
  - c. When?
9. Did you ever apply the techniques you used on the radio stations against any other businesses, persons, or institutions, including law enforcement agencies?

b6  
b7C  
b7D

- a. Please detail which individuals or entities?  
b. When?
10. With whom, other than [redacted] did you share your knowledge of how to access and manipulate the computer operating systems which allowed you to access telephone lines leading to the various radio stations?
11. Have you ever made any alterations in [redacted] [redacted] relating to phone service provided to, or from, the Metropolitan Detention Center in Los Angeles?
  - a. What types of alterations did you make?
  - b. Did you tell anyone about any alterations you may have made?
12. Have you ever offered to obtain classified information for another individual?
  - a. If so, to whom did you make the offer?
  - b. If so, what information did you attempt to obtain?
13. Has anyone ever solicited you to obtain classified information?
  - a. If so, who?
  - b. When?
  - c. What information did they ask you to obtain?
14. Did you sell, or attempt to sell, any of the information you obtained to any foreign governments, or agents of any foreign governments?
  - a. If so, who?
  - b. When?
  - c. Where?
15. Did you ever attempt to notify any foreign government, or agent of a foreign government that you believed there were federal law enforcement wiretaps on their lines?
  - a. If so, who?
  - b. When?
  - c. Where?
16. Are you aware of anyone (hackers, phone phreaks, etc. . .) who has claimed to be associated with the intelligence services of any foreign powers or governments?
17. If you were employed by a foreign government and you discretely wanted to hire someone with your abilities, what steps would you take?

18. Have you accessed any other phone company computer systems  
other than those belonging to

b7D

- a. What companies?
- b. Which systems?
- c. What was the extent and nature of the access?

19. to what extent have you utilized BBS's or E-mail in order to obtain information or to disseminate information?

20. Did you ever advertise, offer, or describe your abilities on a BBS or E-mail?

21. Have you ever utilized a BBS or the internet to teach others your access techniques?

22. Have you given out, or sold, access codes, or any information garnished from the burglaries or computer break-ins of phone company computers, to anyone?

- a. If so, to whom?
- b. When?
- c. How did this information get passed?

November 23, 1994

Mr. [redacted]  
Federal Bureau of Investigation

BAR-4A-107588-1a 134

Dear [redacted]

Thank you for taking the time yesterday to talk to [redacted] and me regarding the Aug 17, 1994, wire transfer fraud in Heller's Glendale, California office. As discussed, accompanying this letter is a document that we sent to the Glendale Police, the Los Angeles District Attorney and the FBI that details the information that we have pertaining to the wire fraud. If you have any questions after reading the document, please give me a call.

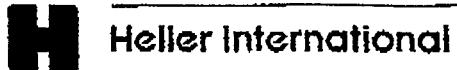

During our telephone call yesterday, you also requested the various passwords that may have been used as part of the wire fraud. Listed below are the passwords you requested.

b6  
b7C

Type of Password	Actual Password
[redacted]	[redacted]

As discussed, the seven people responsible for the wire transfer process in Glendale knew the [redacted] passwords. In addition, they also knew the first 3 Alfa characters of the individual passwords. The individual is the only one who knew the last 4 numeric characters of the password. In order to transfer funds from Heller's account at Mellon, you would need to know the Mellon wire transfer telephone number, [redacted] [redacted] password, the [redacted] and two individual passwords. (The Mellon system requires one person to set up the wire and a different person to release the wire. Hence, you need 2 individual passwords.) In the Heller wire fraud, where \$150,000 was

Heller International Corporation  
500 West Monroe Street  
Chicago, Illinois 60661  
312 441 7000

illegally transferred from Heller's Mellon bank account to Union Bank, [redacted] password was used to initiate the wire transfer and [redacted] password was used to release the unauthorized \$150,000 wire transfer.

If you have any questions about the above or need any additional information, please give me a call at 312-441-7114. If you find any additional links with Heller in your investigation, I would appreciate it if you would call me. Thank you for your help with this matter.

Sincerely,

A large rectangular box used to redact a handwritten signature.

Glendale Police Department  
Glendale, California

Re: Addendum to Report Number 869708

Dear Detective [redacted]:

As we discussed, attached please find an Addendum to Report Number 869708 relating to the wire transfer fraud that was conducted on August 17, 1994 during the bomb threat at our building located at 505 N. Brand Blvd.

b6  
b7C

Please pass this on to the appropriate detective in bunko/forgery. I would be happy to speak to whomever will handle this matter.

Very truly yours,

[redacted]  
Senior Counsel

[redacted] w/attach. ✓

WIRE FRAUD AUGUST 17, 1994  
HELLER FINANCIAL, INC.  
505 NORTH BRAND  
GLENDALE, CALIFORNIA  
Addendum to Report Number 869708  
Glendale Police Department

On August 17, 1994, Heller Financial, Inc. ("Heller") received two phone calls at approximately 1:22 p.m. and 1:24 p.m. in which the callers announced that a bomb was in the building. As a result of the bomb threat, the building was evacuated. Thereafter, at approximately 3:00 p.m. the Heller employees were permitted to enter the building for the purpose of retrieving their personal belongings and were instructed to leave the building for the remainder of the day.

On August 18, 1994, at approximately 8:30 a.m., Heller employee, [REDACTED] reconciled the wire transfers that took place on August 17, 1994 and discovered that an unauthorized wire transfer of \$150,000 had been sent. The wire transfer was initiated at 1:24 p.m. and released at 1:25 p.m. during the midst of the bomb threat.

The wire transfer was sent to an account at Union Bank (Bellflower office) in the name of [REDACTED]. The account was nine months old at the time of the transfer. The account is owned by [REDACTED]. The [REDACTED] requested that Union Bank prepare a cashiers' check in the amount of \$150,000 and attempted to pick up the cashier's check on August 18, 1994.

b6  
b7C

Prior to [REDACTED] arrival to retrieve the cashier's check, Union Bank ("Bank") had been contacted by Heller regarding the fraudulent wire transfer. Union Bank held up the delivery of the cashier's check to [REDACTED] for several hours. The [REDACTED] then had their lawyer [REDACTED] contact the Bank.

The Bank put [REDACTED] in touch with Heller and its lawyer, [REDACTED]. The two lawyers worked out a stipulation regarding the funds which provided that the [REDACTED] would agree to the release of the money to Heller upon Heller's presentation of a declaration describing the unauthorized wire transfer. Heller prepared and delivered the declaration to [REDACTED] however, to date the money remains in the escrowed account awaiting the [REDACTED] approval.

September 14, 1994

Page 2

Addendum to Report Number 869708

The [redacted] claim that the money was received from [redacted] who owed the [redacted] money in connection with certain gas station leases. They claim to have no knowledge of the fact that the money came from a Heller Financial Inc. bank account. [redacted] confirmed that the [redacted] are owed money from [redacted] and that his firm represents the [redacted] in their dispute with [redacted] has not been contacted, but Heller has become aware [redacted] [redacted] who is familiar with the incident at Heller as well as the investigation regarding [redacted]. [redacted] asks that the Glendale Police Department investigator contact him should he/she have any questions.

An internal investigation at Heller has revealed that certain unauthorized entries into Heller's automated wire system occurred during the weeks previous to the actual wire fraud. The following chronology describes the unauthorized accesses into the system, including the fraudulent wire transfer on August 17. Please note that in order to access Heller's system for wire transfers with Mellon Bank (Pittsburgh, Penn) the operator must know the following:

1. phone number to Mellon Bank .
2. connection # (not unique).
3. [redacted] four digit bank account number assigned to Heller's Glendale office known by Heller's Treasury Department at Heller's corporate headquarters in Chicago, Illinois, Mellon Bank and the wire transfer operators.
4. divisional password (varies in number of digits).
5. personal passwords of wire transfer operator. Consists of three letters assigned by Headquarters and four digits known only by operator. The first three letters assigned to the Glendale operators during the period in question are JMR [redacted]; UNG [redacted]; PAI [redacted]; TZK [redacted]; NMH [redacted]; ROY [redacted] and LVM [redacted]

b6

            1:36 a.m. undetermined access.

8/15        JMR expired and renewed (normal 30 day expiration).

8/16<sup>7</sup>       2:56 p.m. attempt to send \$150,000 wire transfer; password used UNG; PG  
            Union Bank; transaction deleted by operator.

<sup>3</sup>all 6 accesses to K01772 from 415 area code. K is number assigned to Glendale office to access system.

<sup>4</sup>CE is the central office for Mellon Bank.

<sup>5</sup>PG is the Pittsburgh office of Mellon Bank where Heller maintains its accounts.

<sup>6</sup>GreenOrange Designs, Inc. is a client of Heller's.

<sup>7</sup>all 6 accesses from 415 area code.

September 14, 1994  
Page 4  
Addendum to Report Number 869708

2:59 p.m. attempt to send \$150,000 wire transfer; password used UNG;PG Union Bank; transaction deleted by operator.  
3:01 p.m. undetermined access.  
3:49 p.m. undetermined access.  
4:33 p.m. undetermined access.  
5:23 p.m. pulling "All Wires Sent"<sup>8</sup> report.

8/17      12:24 p.m. log on from 213 area code to K1772 (JMR and UNG).  
              1:19 p.m. first access from 415 area code.  
              1:22 p.m. (approximately) BOMB THREAT<sup>9</sup> called in.  
              1:24 p.m. (approximately) BOMB THREAT<sup>10</sup> called in.  
              1:24 p.m. \$150,00 wire transfer sent; password used UNG;PG Union Bank to the account of Anu-Ankit Enterprises, Inc.; Account Number 041-001-6672; PAI password used to release wire at 1:25 p.m.  
              2:19 p.m. access from 415 area code; pulling "All Wires Sent" report.  
              3:28 p.m. undetermined access from 415.

8/18      Headquarters changes [redacted] passwords.

All of the operators have been interviewed regarding whether or not their personal passwords were disclosed to unauthorized individuals either intentionally or inadvertently. Only one operator has admitted a possible error in that she [redacted] wrote her password down on a post-it note which was taped to her computer for 24 hours. This occurred during the week before the bomb threat. Even if her password were known, the perpetrator would still have to know another personal password in order to send a wire.

At this time Heller has not been able to determine from phone records of either Heller or Mellon Bank the origination of the wire. Although access for the wire transfer was initiated from the 415 area code according to Mellon Bank's records, this is not conclusive because a local phone call may be switched through the 415 area code to Mellon Bank and thus show on Mellon Bank's records as a 415 access. Sprint, Mellon Bank's long distance carrier, has been unsuccessful in tracing the unauthorized phone call/access back to the initiator of the call. Similarly, [redacted] has not been able to identify the calls made from the operators' computers for the foregoing dates because the numbers used to reach Mellon Bank from those terminals are local numbers. We are told by [redacted]

b6  
b7C  
b7D

<sup>8</sup>"All Wires Sent Report" is a report that lists all wire transfers successfully sent that day.

<sup>9</sup>Initial bomb threat called in to reception.

<sup>10</sup>Second bomb threat called in to sales department--within 10 feet of wire desks.

September 14, 1994  
Page 5  
Addendum to Report Number 869708

that no records are maintained of local calls (local calls are defined as within area code and certain distance parameters).

Interviews conducted at Heller of its employees have not been conclusive, although it is clear that the passwords used were those of [redacted]

Addendum to Report prepared by [redacted] Heller Financial, Inc.

# **SPY SUPPLY INC.**

*423 WEST 81st AVE. MERRILLVILLE, IN. 46410*  
VOICE/FAX/DATA: (219) 736 - SPYS  
FAX ONLY: (219) 756 - 1024

## **COUNTERMEASURE SWEEP**

This receipt states that a physical and electronic check was conducted at the address listed below. However, due to the unknown seriousness of the entity or entities which could be compromising the privacy at the address listed below, the price listed for the sweep will indicate the level of security during the sweep. There for, the accuracy of the sweep will also be determined by the listed price.

Should there be any questions of said sweep, they should be directed to and in person with the President of the corporation or the engineer directing the sweep. These questions should be taken up at the address listed in the header logo. There will be no conversation with any of the person/s conducting the sweep before, during, and after the sweep. This could seriously compromise our efforts to conduct an accurate sweep. The results of our sweep will be presented in writing and can be obtained at the address above. The written report will list all items used for the surreptitious interception of oral communications. As well as, list the items that could be compromised for said activity.

The sweep will contain the physical check of the premise listed below. As well as, the objects therein. Finally, there will multiple electronic test taken for various kinds of transmitted audio carriers.

**Place of sweep:**

139C 24-127588-14138

**Cost of sweep: \$500.00**

I the undersigned agree of the terms stated above, and I have read the statement thoroughly and understand these terms.

**Signature:**

## **RESULTS OF COUNTERMEASURE SWEEP**

### **TYPE OF SWEEP CONDUCTED:**

- 1.) R.F. FREQUENCY SWEEP FOR RADIO TYPE LISTENING DEVICES**
- 2.) CARRIER CURRENT SWEEP PERFORMED FOR AC LINE TYPE LISTENING DEVICES**
- 3.) FREQUENCY SPECTRUM SWEEP PERFORMED FOR MIDWAVE THROUGH SATCOM FREQUENCIES**
- 4.) PHYSICAL INSPECTIONS OF SEVERAL LARGE ELECTRICAL DEVICES AND PHONE IN SPECIFIC TARGET AREA**

# **REPORT**

After consulting since approximately [REDACTED] with our client [REDACTED]  
[REDACTED] IN we have found conclusive evidence that [REDACTED] has definite  
need to be concerned for his privacy for both his oral communications within his home including  
phone communications.

Upon our first encounter with [REDACTED] we were asked to look at a device which was found at the clients place of residence. After analysis of circuit in question it was found to be a sophisticated listening & phone monitoring device, commonly known as an infiniti transmitter. These transmitters are commonly available, but what makes this particular I.T. a high level threat is that it is designed for a phone & room interception. These are usually only accessible to authorities.

Sweep of the house proved positive for radio frequency listening device within the government frequency band allocated for such uses. Our concerns for our client lead more towards helping Brent utilize wit's rather than a bruit force approach of attaining some level of personal privacy.

## **CONCERNS:**

- 1.) RF sweep proved positive for at least two wireless audio devices.
- 2.) Radio spectrum sweep, midwave through satcom, confirmed aforesaid readings.
- 3.) Frequency demodulation of detected signals proved positive by confirming feedback of room monitor source.
- 4.) Frequency count confirmed and locked frequencies on the first transmitter at 139. Mhz band.
- 5.) Frequency count confirmed and locked frequencies in the second transmitter at 470. Mhz band.
- 6.) Location was not attempted due to the frequency band that these devices operate in. The potentiality that these devices are governmental in nature, including the one previously analyzed, leads us to consult our client on measures other than bruit force i.e. removal, destruction of such devices on this level no good can come of it.

VERBAL CONSULTATION AND [REDACTED]

UNTER [REDACTED]

CLIENT [REDACTED]

DATE [REDACTED]

# **SPY SUPPLY INC.**

423 WEST 81st AVE. MERRILLVILLE, IN. 46410  
VOICE/FAX/DATA: (219) 736 - SPYS  
FAX ONLY: (219) 756 - 1024

## **RESULTS OF EQUIPMENT TEST**

### **1.) VCD - 42**

The VCD-42 when tested did not act accordingly. To us it seemed that the VCD-42 did not react to any of our cameras, and also did not react to our T.V. We test the unit with the T.V. because the T.V. emits the same microwave signal as video cameras do.

We conducted the same test on our own VCD-42, and the VCD-42 worked accordingly when tested on our cameras and our T.V.

This would lead us to determine that the first VCD-42 is not in working order.

### **2.) R.F. SIGNAL METER (SOUTHERN SECURITY)**

When we tested the signal meter on a low out put transmitter there was no reaction. When put by a television the meter went off the scale, even though the television was not operating at the time. This would lead us to believe that the R.F signal meter is not in working order.

We did not get a chance to test the telephone test option on the unit. Therefore, we cannot give a hypothesis on this test.

<b>Objective</b>	Creative and challenging position with significant opportunity for growth, building upon my skills in UNIX systems programming and networking.
<b>Experience</b>	<i>SRI International</i> , Menlo Park, California
1/87 - present	<i>Assistant Programmer</i> : Developed software to support local users and system administrators. Implemented a <i>refer</i> to <i>bibtex</i> converter. Wrote a window-oriented talk program using a new application-level protocol. Wrote a calculator tool using the <i>sunttools</i> library. Wrote tools to implement local system security policy; Modified system programs to provide additional security audit trails. Authored a program to manage and display the information in the BELLCORE V&H tape (the national telephone prefix location database). Working with SRI clients, installed and administered systems for a variety of project demonstrations and field exercises. Co-authored an SRI technical report.
1/86 - 12/86	<i>Programming Assistant</i> : System administrator of a critical departmental computer facility consisting of twenty Sun workstations and a Sun file server as well as two Vax 11/780 UNIX systems. Installed and upgraded system software. Carried out major and minor bugfixes to system software. Worked on various programming projects including implementing the client side of a network service that performs dictionary lookups. Wrote UNIX manual pages describing locally developed software. Security supervisor for a classified computer facility.
10/84 - 12/85	<i>Computer Operator</i> : Responsible for day-to-day operations of a computer facility comprised of three Vax 11/780 UNIX systems. Performed regular backups, restored files, assisted and educated users, maintained system databases. Maintained hardware, interfaced with field service personnel. Installed and configured new Sun and Vax systems.
<b>Education</b>	
3/87	<i>University of California, Santa Cruz</i> : Extension Program UNIX internals course. Studied the structure and implementation of both the 4.3 BSD and System V UNIX kernels.
9/83 - 6/84	<i>San Fernando Valley College</i> , Los Angeles, California First-year undergraduate coursework.
<b>Special Skills</b>	Detailed understanding of the 4.3 BSD UNIX system. Assembly language experience. Experience with and understanding of the Internet protocol family (TCP/IP, SMTP, Telnet, FTP, Domain name system). Experience with telecommunication systems hardware and software. Talented C programmer.
<b>Other Interests</b>	Music, Photography.
